PROFESSIONAL EXPERIENCE

University Projects

Marketing Research Report
- Conducted market research to analyze consumer behavior and market trends for a hypothetical business.
- Applied various research techniques such as surveys, data analysis, and online market tools.
- Collaborated with a team to create strategic recommendations for brand positioning based on findings.

SQL Database Development Project
- Developed a fully functional database system using SQL for managing company data, including employee records and customer transactions.
- Created queries, stored procedures, triggers, and optimized the database using PL/SQL.
- Delivered documentation and user manuals as part of the project.

IT Project Management – Procurement System Implementation (in process)
- Supported project teams in simulating the implementation of a procurement system, focusing on user needs and operational workflows.
- Created documentation for procurement processes and provided recommendations for improving workflow efficiency.
- Conducted analysis and testing to validate system functionality and performance metrics.

Human Resources Management (HRM) Simulation
- Designed and implemented HRM strategies for employee recruitment, training, and evaluation in a simulated business environment.
- Applied HRM principles to address staffing requirements and employee development.
- Presented project outcomes, focusing on resource allocation and performance improvements.
